### Professional skills

### Software skills

## Experience

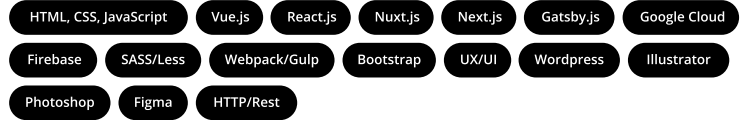

2016 - now

### Founder, Designer & Full Stack Developer

Self-Employed @ Natives.studio, Zandhoven BE

In the process of studying for my bachelor's degree, I started my own company and worked for several clients in my spare time. After my degree I aim to function as a freelancer. In addition, I also help small businesses with the development of there websites, design, branding, ... .

#### Used Skills

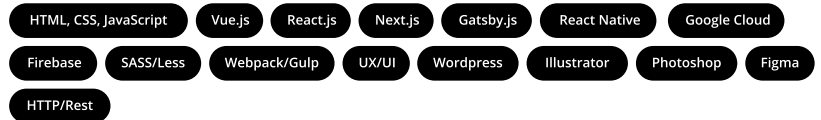

2019 - 2020

### Full Stack Developer

Freelance @ Mother, Wetteren BE

For more than a year I worked as a freelancer at Mother. It is a StarUp with a mission to make the world more self-sufficient with industry proven technology products. I helped Mother by making it digital. I Developed an Android and iOS app, An intern Parcel system that processes all the orders by automatically generating shiping labels and a Website/webshop that acts like a WebApp

#### Used Skills

2019 - 2020

### Frontend Developer

Freelance @ Tobania, Grimbergen BE

From December 2019 until February 2020 I created an iOS & Android app for Tobania. The application is written in Ionic React.js with an ASP.NET backend. I was responsible for the entire frontend with connections to the backend in order to deliver a nice POC version of the project.

#### Used Skills

## Education

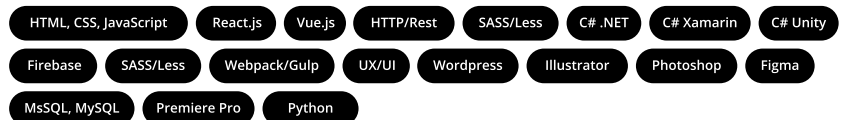

2016 - 2019

### Bachelor Media and communication technology (MCT)

Achieved @ Howest, Kortrijk BE

This Bachelor focused on making good projects that fits real life situations. From creating APIs with .NET and making a good structured backend to using APIs in Vue.js for the frontend. This is just one example. We covered also Xamarin iOS apps, IoT projects, UX/UI designs, video editing, Microsoft hololens projects with Unity, ... .
